

Exterior Motorized FlexShade® XL

FOCUSED ON
INNOVATIVE
SOLUTIONS

The Exterior Motorized FlexShade® XL offers outdoor solar control for larger windows or openings. It combines convenience and ease of use with a simple wall switch or remote control. Perfect for residential and commercial settings, the shade can be quickly and quietly adjusted to the desired position to filter harsh sunlight, controlling glare and temperature in your space.

ADVANCED SOLUTION

- Available in sizes up to 192" (488 cm) w and 132" (335 cm) h, depending on fabric selection.
- Curved or angled headbox available. Dimensions for both headboxes: 5" w x 5" h (127 mm x 127 mm).
- Hardware finish is textured powder coat available in white, black, ivory, sand, or charcoal bronze. Custom powder coat colors available.
- Cable guides required for wind protection (secures hem bar only, not fabric).
- Extruded aluminum, weighted, exposed hem bar stabilizes shade during operation.
- Powder coated hem bar available in standard exterior powder coat colors. Custom powder coat colors available.
- Shade system should be retracted when winds reach speeds over 15 mph or when movement is causing discomfort through noise or distraction. For areas where high winds are likely, refer to our FlexShade® ZIP XL.
- Radio frequency motor (standard). Standard 4 wire motors available upon request.
